----------- PERCENTILE SCORES -----------
```

TRUTHFULNESS SCALE: Although in the truthful range, some defensiveness or guardedness is evident. VAI scale scores should be accurate.

DRIVER RISK SCALE: This score is in the driver risk range. This person would benefit from a self-analysis of driving attitude and behavior.

ATTITUDE SCALE: Although usually having an average positive attitude, this person's disposition and behavior may change with their mood.

SELF-ESTEEM SCALE: This person may manifest a problem prone or poor self-concept. Negative self-appraisal or criticism are likely.

STRESS COPING ABILITIES SCALE: Stress is a major adjustment problem. Stress management counseling/lifestyle adjustment would be beneficial.
